(54) PORTABLE INPUT/OUTPUT DEVICE

(57)Abstract:

PURPOSE: To obtain the portable input/output device which can prevent energy from being consumed in vain by forgetting the turn-off of illumination and enables an operation for a long time.

CONSTITUTION: An illumination sensor 1 is provided near a display part 5 equipped with an EL (Electro-Luminescence) board for illumination, an EL inverter circuit to control the quantity of power supplied to the EL board corresponding to the output of this illumination sensor 1 is built in a portable input/output device and with the increase of surrounding brightness, the light emitting quantity of the EL board is automatically decreased or the light emission is stopped.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
